

# Backend Developer — Python / Django

Mohammad Hosein Heydari

Bojnord, Iran    heidarimohammadhosin@gmail.com    +98 999 953 5022    [github.com/mhmdheydari](https://github.com/mhmdheydari)

## SUMMARY

---

Backend Developer focused on Python, Django, and Django REST Framework. Skilled in building RESTful APIs with JWT authentication, Redis caching, PostgreSQL, Docker, and rate limiting. Interested in building secure, efficient, and maintainable backend systems with a focus on clean architecture and API performance.

## PROJECTS

---

### Django Shop API — Online Store REST API

*Django, DRF, PostgreSQL, JWT, Redis, Docker, Swagger*

- Developed RESTful APIs for an online store with product, category, and user management.
- Implemented JWT-based authentication with access and refresh tokens and protected API endpoints.
- Used Redis for caching to improve response times and reduce database load.
- Implemented rate limiting for selected endpoints to prevent excessive requests and API abuse.
- Dockerized the project and documented the API using Swagger.

Repository: [github.com/mhmdheydari/API-Shop](https://github.com/mhmdheydari/API-Shop)

### Django RestBlog API — REST API

*Django, DRF, PostgreSQL, Docker, Swagger*

- Developed a RESTful blog API using Django REST Framework.
- Implemented authentication and permission controls for managing user-specific resources.
- Implemented filtering, ordering, and pagination for blog data.
- Containerized the application using Docker.
- Documented and tested API endpoints using Swagger and Bruno.

Repository: [github.com/mhmdheydari/DjangoRest-Blog-Api](https://github.com/mhmdheydari/DjangoRest-Blog-Api)

### AI Chat Website

*Django, PostgreSQL, OpenAI API, Google OAuth*

- Developed an AI chat application integrated with the OpenAI API.
- Implemented Google OAuth for user authentication and login.
- Implemented persistent chat history, allowing users to access previous conversations.
- Designed a user dashboard for managing and viewing conversation history and activity.

### Django Clothing Store — Online Clothing Store

*Django, PostgreSQL, Google OAuth*

- Developed an online clothing store with product filtering based on categories, sizes, and colors.
- Integrated a payment gateway and implemented coupon functionality for the checkout process.
- Designed both shopping and blog sections, allowing users to browse products and read articles.
- Implemented the product browsing and purchasing workflow using Django.
